Welcome onboard our new trains & buses

A warm welcome onboard our new trains & buses which have been delivered in order to start service at the launch of New Harlon. Trains have a 400% to 750% capacity increase compared to HL, depending on the line; ensuring nobody gets left behind.

For more information regarding buses

All bus services marked on this map have a frequent turn-up-and-go frequency, in which no timetable is needed as the next bus is not far away.

Other HT bus lines, which are not marked on this map, follow timetables which can be found at bus stops that the routes serve.

Get around easily with HIWS

Squinting at signs is now a thing of the past - introducing HIWS (Harlon Integrated Wayfinding System) - a signage system with large text, icons, colour coding and easy legibility. It's now easier than ever to get around the network!

24 hour service - all day, all night long

Say goodbye to longer wait times late at night - 24 hour service is here! Service frequency is now the same, no matter what time of day it is. Just another initiative HarlonTransit is implementing to make your journey more enjoyable.

Check #transportinfo for updates

Any service disruptions and new services on the network will be posted in the **#transportinfo** channel on Discord - make sure to join the transportinfo ping role to ensure you are notified of any service updates!

Go2 is the way to go

HarlonTransit uses Go2, a reloadable stored value smartcard. You **must have a valid Go2 card**, and you **must tap on and tap off** at the start and end of your journey. **Fines of £7.5 apply.**
